Fortunate Motsoeneng- Software Developer

Johannesburg, South Africa |Fortunaterefilwe@gmail.com

Linkedin | Github-Profile | Personal-Portfolio

Professional Summary

I am an analytical and motivated graduate with a strong background in full-stack development, user-centered design, and front-end architecture. Skilled in building intuitive and responsive user interfaces, as well as robust back-end systems using modern frameworks and best practices. I bring hands-on experience in UI/UX design, component libraries, RESTful APIs, and Agile development. Known for a problem-solving mindset, creative approach to digital experiences, and a passion for crafting seamless user journeys through continuous learning and collaboration.

Technical and Design skills

Backend: Java, Spring Boot, Node.js (basic), MySQL, API, MVC Architecture

UX & Visualisation: Figma, UX Research, Prototyping, Responsive Design

Cloud & Connectivity: Microsoft Azure ,Version Control (Git), Postman

Databases: MySQL, MongoDB (intro), Relational/NoSQL concepts

Frontend: HTML, CSS, JavaScript, React.js, Responsive Design, React TailwindCSS, Bootstrap,

Soft Skills: Logical Thinking, Accountability, Collaboration, Communication, Adaptability, Problem-Solving

Education

Red and Yellow Creative school of Business | 2024-2025
National Certificate in Design Techniques (User-Centered Design)

IIE Rosebank College |Completed 2021
Diploma in IT in Software Development

Experience

Afrimate Consulting – Lead Front-End Developer & UX/UI Intern *2025 – Present*

- Identified Opportunities: Analyzed client needs to design enterprise system interfaces using Next.js, TypeScript, and TailwindCSS.

- Defined Requirements: Translated abstract business goals into clickable prototypes and functional code, improving user engagement.

- Designed Solutions: Championed scalable component design based on user feedback, reducing development time by 20%.

- Guided Adoption: Collaborated in Agile sprints to ensure smooth transition to new systems for stakeholders.

Tsimologong Wits – Full Stack Developer Intern *2023 – 2024*

- Developed full-stack tools with Java, Spring Boot, and React.js
- Contributed to database design, RESTful APIs, and backend logic
- Participated in QA, testing, and sprint-based delivery

TMG Makerspace – UX/UI Designer & Software Developer *2022 – 2023*

- Designed staff attendance interface (COGTA project)
- Built functional mockups and collaborated across tech and design teams
- Conducted basic usability testing to inform UI decisions

.

Certificates

- **Microsoft Azure:** Azure Fundamentals
- **AWS Training:** Cloud Native, DevOps, Agile & NoSQL Essentials
- **Google:** Foundations of User Experience (UX) Design
- **Coursera:** AI Essentials, DevOps Essentials, Generative AI Essentials
